Description:

- Provide individual psychotherapy with consumers to provide support and insight.
- Facilitate group therapy sessions within the house.
- Coordinate clinical care with case management services and other services both inside and outside of MHCD.
- Assess consumers throughout the workday, and provide appropriate interventions. Encourage, support, and train consumers in activities of daily living (ADLs) - teaching consumers about hygiene, help make appointments, show how to do household duties/chores, such as cooking, cleaning.
- As part of a multi-disciplinary system, help facilitate the treatment and continuity of clinical care.
- Complete intake and discharge tasks for consumers being placed in the house as new residents or moving out of the house.
- Document all significant consumer interactions toward recovery and continuity of care.
- Complete necessary clinical documentation, such as the daily log, consumer record, and medication records.
- Respond to consumer and building emergencies, and facilitate appropriate interventions.
- In emergency situations, contact other residential staff, your supervisor, or other clinicians when needed.
- Advocate for acceptance and integration of individuals with mental illness within the neighborhood and community in which they live.
- Perform other duties as assigned.
